

Periodontology Price Guide

Initial Consultation with X-rays £ 95.00

To include a full periodontal assessment recording plaque scores, recession, mobility, furcation involvement and loss of attachment plus intra-oral x-rays if required. A written treatment plan for both the patient and referring practitioner will be provided.

Surgery

Quoted for individually.

Active Treatment

Active treatment includes appointments for oral hygiene advice, oral hygiene review, root surface disinfection under local anaesthetic (possible multiple) and periodontal reassessment following this phase of your treatment, (usually three months later).

The number of root surface disinfection appointments required vary from patient to patient and is dictated by the extent of disease and the number of teeth present. Thus fees range from £460.00 to £1000.00. An estimate for your treatment need will be given to you at the beginning of your treatment.

Additional Investigation

Additional radiographs may include either

3 Dimensional scanning £150.00

or

OPG radiograph (both available at the practice) £45.00
